The New England Journal of Medicine would like to invite attendees to an online interactive discussion following the conference on NEJM Resident 360. NEJM Resident 360 is a resource designed to help medical students and residents successfully and confidently navigate residency and beyond. One of the offerings within is a discussion platform, where the goal is to create active conversations around important ideas.

The discussion will take place from January 11 – 20, 2021. There is no set time during that period; you may sign on and join the conversation when it is convenient for you. Create a free account and follow the discussion to receive a daily email with a list of open

questions. Post your own or respond to existing questions at any time. The discussion is publicly available for anyone to view, but to participate one must be a physician or a medical student and member of NEJM Resident 360.
